The E1 rate schedule is not time-of-use dependent, thus these rates apply no matter when energy is used (e.g. rates are fixed for any time of day or any time of year).

**Notes:**

1) Total Minimum Charge Rate ($ per meter per day) is $0.32854. This is equivalent to about $10 a month.

2) Under a new Net Energy Metering 2.0 program for solar billing enacted for PG&E customers interconnected after 12/15/2016 (as 5% of PG&E’s cumulative peak demand is met by solar), any electricity a customer uses that is supplied from the grid (i.e., when meter goes forward) is subject to a 2.3 cents per kWh charge for the non-bypassable charges.

3) For solar customers under NEM 2.0 the E1 rate schedule is no longer available.

A time-of-use electric rate, either ETOU (option A or B) or EV-A will be required for new PV systems interconnected under Net Energy Metering 2.0 for solar billing. This will be enacted for PG&E customers interconnected after 12/15/2016 (once 5% of PG&E’s cumulative peak demand is met by solar). And any electricity a customer uses that is supplied from the grid (i.e., when meter goes forward) is subject to a 2.3 cents per kWh charge for the non-bypassable charges.

Minimum Energy Charge ($ per meter per day): $0.32854, about $10 a month as of 9/1/2015
