

# WILL BOWDEN

- Will leads Cobalt's design department which is often the most sophisticated and complex solar designs on residential homes and commercial projects.
- Will also leads Cobalt's channel partner network, such as SolarTech, Axia by Qcells. That included developing a process for collecting the proper requirements for the solar industry financiers. Confirming that these processes are executed well are the key to financial health of the business.
- Cobalt's reputation among the residential custom home builder community enables Will to work in a collaborative way with this unique channel to deliver on expectations.
- Will worked on the Apple Maps initiative that enabled state of the art turn by turn directions throughout the country.
